Introducing ISUS - the Newest Compartis® Member

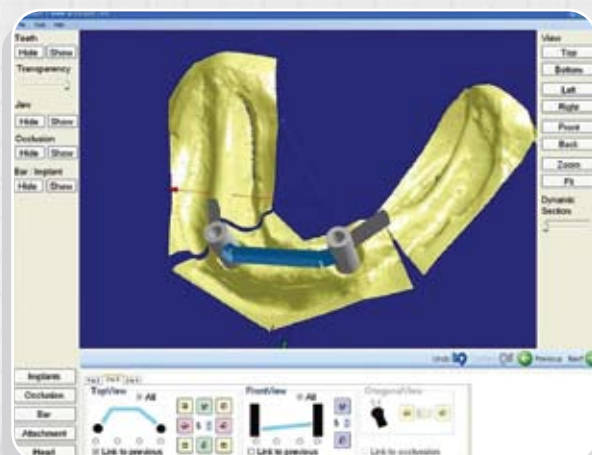

Compartis ISUS Bars & Bridges: Implant SUPra Structures – offering new horizons in implant supported prosthodontics.

The dynamic growth in oral implantology during the past few years has greatly enhanced the position of implant-supported restorations in prosthetic dentistry. As this growth continues, it offers exciting opportunities for collaboration between dentistry and dental technology.

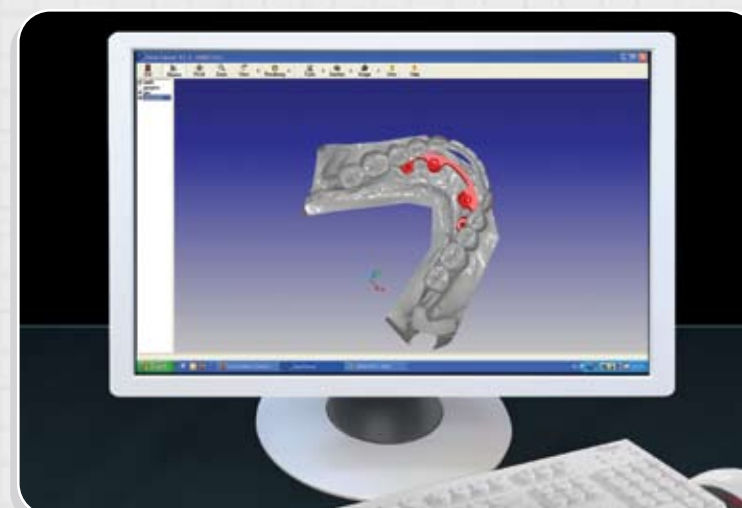

Proven Technology

This exciting new technology comes from unique proprietary CAD CAM tooling, bringing years of CAD CAM success to DENTSPLY's Compartis USA. Now, superstructures for implants that previously required time consuming special casting techniques - often with inexact results - can be CAD designed and CAM milled for ultimate precision.

From bars for edentulous patients to fixed dental prostheses, Compartis ISUS provides the smart solution (in **Cobalt Chrome** or **Titanium**).

The Compartis® ISUS Advantage

- Unique proprietary CAD CAM technology
- Consistent, reproducible high quality
- Self-tapping superstructures for all brands of implants
- Cylinder design makes abutments no longer necessary
- Screwed directly on implant
- Can be used in combination with attachments and extensions
- Precision fit to 20 microns
- Tension free fit
- Lightweight and strong
- No need to inventory components
- 10-Year guarantee
- Design file is stored for 10 years
- Available in Titanium or Chrome Cobalt

ISUS Bars

- Milled from one solid block
- No soldering or laser welding
- Perfectly biocompatible
- Precision fit
- Lightweight design for patient comfort

ISUS Bridges

- Screwed directly on the implant
- Directly fused with ceramics
- Perfectly biocompatible
- Inexpensive compared to alternative precious metal

Compartis SmartSourcing

Eliminate waxing, casting, seating and finishing. Just ship us your model with analogues and the wax-up, and your ISUS bar or bridge will be CAD designed and precision milled at Compartis then quickly returned finished and polished ready for porcelain or denture fabrication.

Simple Production Sequence
