

10x Fully Seated

Precision You Can See

All Coral copings and bridge frameworks are returned fully seated using water irrigation hand pieces under a 10-power stereo microscope for the ultimate in final fit quality.

2 Esthetic Materials + 21 Shades

Perfection for All Indications

Esthetics Supporting Nature

Coral copings and bridge frameworks are available in two unique material blends. A High Translucent material offers unparalleled esthetics in a 950Mpa understructure while a 1,250Mpa High Strength material offers unbeatable strength for any indication.

\$49 Shaded Any Single Uniform or Contoured
\$54 Shaded Bridge Units Includes Connections

Hue, Chroma and a Great Value

High quality shaded zirconia copings and bridge frameworks at a price you can afford with no hidden charges. Coral's simplified pricing of just \$49 for singles and \$54 for bridges includes shading, all finishing and return shipping.

Build Your Business Today

Building your esthetic zirconia business has never been easier, faster or felt better to do. That's because you can get Coral today without using a competitor and with no up-front expense. There's no equipment to buy and Coral is compatible with your existing zirconia ceramics.

Flexible Workflow

Getting Coral is easy just by sending your model work to Dale Dental. Because Dale only makes Coral copings, your lab is still in complete control of the fit, function and esthetics of each case through your own model work and ceramics. Your doctors will recognize your labs adherence to their preferences and style on every case.

DESIGN ESTHETICS FIT

Quality Comes Together

With quality scores exceeding 4.9 out of 5, Coral zirconia copings are quickly setting the standard for the ultimate in fit quality, design and esthetics. Plus, since every Coral understructure is centrally manufactured by just one team, the quality is not only highly scored, but highly consistent as well.

Laws of Esthetics Meet the Laws of Compliance

The United States Food & Drug Administration requires the use of only Good Manufacturing Process (GMP) compliant labs for the manufacture of understructures you receive from any laboratory. Dale's industry leading ISO 9001:2008 compliance, and the certificate of compliance we provide for your records, ensures your lab is compliant in maintaining such compliance. A 16-part OSHA/ANSI approved MSDS represents the composition of the completed Coral restoration.

Anatomy of Identification

The Coral Optical Zirconia system features authentication labels for both the laboratory and doctor. Each label contains a unique authenticity number which can verify genuine materials, USA manufacture and GMP compliance. Additionally, the laboratory label contains important case information such as material type, manufacture date and Dale Dental case identification number for easy recall.

Performance is Covered

All Coral copings and bridge frameworks carry the same five-year material guarantee that has become commonplace in the industry, with one major difference. While all manufactures pay at the laboratory level, their performance guarantees are advertised at the doctor level putting the laboratory in the uncomfortable position of standing behind the product at a much greater level than the manufacturer. Coral is paid at the laboratory level and advertised only at the laboratory level.

Order Online at DaleDental.com/Order

Getting Coral copings is fast and easy anywhere in the world. Simply sign on to DaleDental.com/Order and enter your case online. Once entered the system automatically prints unique PanTags™ that hang in your pans quickly identifying each case. Additionally, a single packing slip and overnight air bills are automatically printed for your shipment. You can revisit the site at any time to check the status of your cases and even complete online quality control cards to earn valuable reward points for totally free round trip shipping, gifts and more.
